Aaron and Jeff were a tremendous help to us as we incorporated new staff into our systems last Fall - providing us with all the we needed to assist with the transition - they truly went above and beyond what you would expect. So when we were faced with introducing a Citrix server into our environment and knew that we would need a consultant to help we trusted and believed that Accu-Networks could help us out. The timeline was aggressive and they met each milestone in a timely fashion - working nights and weekends. They did a FANTASTIC job - asked all the right questions, knew the best way to configure the Citrix server based on our needs. The project was a success due to their vast knowledge, their work ethic and the great personalities they have!
